To insure a stable and economic performance of
inverter on d-c transmission, it is necessary to
maintain automatically the magnitude of extinction
angles of the valves. This article describes one of the
several alternate designs of corrector whose purpose
is to reset the angle of extinction when it departs from
a predetermined value.

Spongioblastoma multiforme is a malignant neoplasm
giving commonly a clinical picture of an inflammatory
disease. In its histological structure, by the tissue
reaction near the tumour and at a distance from it,
and by its general vascular and dystrophic changes in
the nervous system and internal organs spongioblas-
toma multiforme is more like an infective granuloma
(Biological Sciences: Pathology. TT, v. 8, no. 3)
